TIPS FOR CREATING A HEALTHY HOME

ABOUT US

*When the health of
your family matters...*

"Would you sell your home to follow what you believe in? We did!"

The Etheco story begins in June 1999 with the establishment of the Australian College of Environmental Studies. Husband and wife team Mark Netherway and Nicole Bijlsma began to realise the extent to which homes were the underlying cause of many illnesses.

As the leading educators of health hazards in the built environment, we were continually frustrated with the cost and poor quality of cleaning products marketed as 'natural' – the great majority of which were not much better than what could be found on a supermarket shelf.

"We couldn't find products we could recommend, so we made our own"

So we set out to create a range of products that would revolutionise the industry and set a benchmark for products in health food stores.

There are many 'green' cleaning brands that are environmentally friendly, but few have been developed to consider the **health of your family**. Whilst researching subject material for the Building Biology course at Australian College of Environmental Studies (ACES), Nicole realised early on that there were a lot of discrepancies with the cleaning products marketed as 'natural'. For a start, most of them do not perform up to their claims, they are considerably more expensive than supermarket brands, and they contain toxic chemicals that are known lung, skin and eye irritants. Many contain ingredients that have never been tested for long term health affects! So why would you put them on your body or in your clothes?

Being parents ourselves we understand what you expect from the products you buy. We have gone to extreme lengths to ensure our products work the same– or better the leading brands without the use of nasty chemicals. Abode are developed and manufactured in Melbourne to unbelievably stringent standards, using the best natural ingredients money can buy. Importantly, the Abode range contains only **food grade** ingredients - meaning they are 99.99% pure, whereas **industrial grade** ingredients are only 72% pure and are most commonly used in cleaning ingredients.

As you will discover, we are no ordinary company...

INGREDIENTS

Ingredients you can trust..

No one makes cleaning products like we do.

At Abode, our priority has always been on health of you and your family. Our range was developed from the ground up specifically for people with chemical sensitivities, and to work as effectively—and surpass the commercial market leaders.

All Abode cleaning products are plant and mineral based. They contain no nasty chemicals.

Abode only uses FOOD GRADE ingredients, which mean they are 99.99% pure. Compared to INDUSTRIAL grade which is only 72% purity!

INGREDIENT	SOURCE	PURPOSE
Alkylpolyglucosides (APGs)	Derived from corn, wheat and coconut	A surfactant
Aqua	Purified water	
Baking soda (food grade)	It is a component of the mineral natron and is found dissolved in many mineral springs.	A softening agent and helps to remove odors from clothes
Essential Oils	Organically and naturally derived (no synthetic fragrances)	Fragrance
Glycine extracts	Amino acids	Preservative
Glycolic acid	Found in vegetables	An acidity regulator
Grain alcohol	From Australian sugar cane (QLD)	Preservative and anti streak agent
Lactic acid	From glucose	An acidity regulator
Sodium carboxymethyl cellulose	From wood fibre	Anti-re-depositing agent
Sodium coco sulphate	Derived from coconut oil	A surfactant
Soda Ash	Made from sea water using the Solvay process	An alkalinity builder
Sodium disilicate	Derived from sand	An alkalinity builder and water softener
Sodium lactate (food grade)	Salt of lactic acid	A humectant
Sodium cocoyl isethionate	Derived from coconut oil	A mild surfactant
Sodium citrate (food grade)	From Citrus fruits	Builder
Sodium gluconate	From glucose	An anti caking agent and chelating agent.

LAUNDRY

ABODE LAUNDRY POWDER

TOP LOADER

Eucalyptus

- SUITABLE FOR HOT AND COLD WATER WASHING
- BIODEGRADABLE AND GREY WATER SAFE
- ULTRA CONCENTRATED FORMULA

PRODUCT DESCRIPTION

A high performing revolutionary powder that's a radical departure from standard green and eco products.

Free from the concoction of dangerous chemicals such as phosphates, petrochemicals, zeolites, and optical brighteners, this powder is highly effective in cleaning clothes using plant based natural ingredients.

The extremely concentrated recipe recommends you only need a little amount (just a tablespoon) making it economical as well as safe and effective!

Includes organic eucalyptus essential oil which effectively removes stains and refreshes bedding and clothing.

Our Code	Description	UOM	RRP

LAUNDRY

ABODE LAUNDRY POWDER

TOP LOADER

Wild Lavender & Mint

- SUITABLE FOR HOT AND COLD WATER WASHING
- BIODEGRADABLE AND GREY WATER SAFE
- ULTRA CONCENTRATED FORMULA

PRODUCT DESCRIPTION

The Abode Lavender & Mint Laundry Powder is made from the best quality ingredients that money can buy, is free from petrochemicals, zeolites, phosphates and salt found in most conventional products and specifically designed from the ground up taking into consideration the health of your family.

Our extensive in-house testing shows performance beyond that of conventional brands. It is ultra concentrated and requires only a small amount to give optimum results in the wash, containing powerful natural ingredients to assist in the removal of stubborn stains.

Best of all, its so concentrated you only need to use a tablespoon not a scoop!

ABODE LAUNDRY LIQUID

Sensitive

- FORMULATED SPECIFICALLY FOR SENSITIVE SKIN
- TOP & FRONT LOADER-MACHINE USE
- HOT AND COLD WATER
- GREY WATER AND SEPTIC TANK SAFE

PRODUCT DESCRIPTION

Specifically formulated for people with extra sensitive skin, the Laundry liquid is free from nasty chemicals, enzymes, optical brighteners and fragrances of any kind.

A revolutionary high performance hypoallergenic laundry liquid that is specifically designed for the most vulnerable in our society – babies and children, pregnant women, the immuno-compromised and people with skin and chemical sensitivities.

Using cutting edge plant and mineral based technology, the Abode Laundry liquid offers powerful effective cleaning without the environmental and health hazards associated with conventional brands. The unique fragrance free formulation does away with nasty chemicals such as phosphates, zeolites, optical brighteners, artificial fragrances and harsh surfactants like coco-betaine which commonly affect people with sensitive skin.

LAUNDRY

ABODE LAUNDRY LIQUID

Baby

- FORMULATED SPECIFICALLY FOR BABIES SKIN
- FRONT AND TOP LOADER MACHINE USE
- HOT AND COLD WATER USE
- GREY WATER AND SEPTIC TANK SAFE

PRODUCT DESCRIPTION

Babies have different skin to adults.

We believe no other products come close to protecting the skin of those we cherish the most. Abode Baby Laundry liquid is perfectly suited for cleaning childrens clothes, with no nasty chemicals commonly found in many other brands such as petrochemicals, LABS acids and semi-synthetic plant surfactants such as coco betaine or ethoxylated compounds.

Specifically designed with lipid layer enhancers to assist in the health of babies skin. It is completely free of nasty chemicals, fragrances, and enzymes of any kind therefore making it perfectly suited to infants, and people with ultra sensitive skin. Using cutting edge natural plant and mineral based technology the Abode baby liquid offers unbelievable cleaning without the environmental and personal hazards normally associated with standard brands. It is totally phosphate and zeolite free, grey water safe and biodegradable. It is ultra concentrated and requires only a small amount to give optimum results in the wash.

NATURAL FLOOR CLEANER

Lavender

- HIGH PERFORMANCE CONCENTRATED FORMULA
- NO BLEACH OR AMMONIA
- CITRUS AND D-LIMONENE FREE

PRODUCT DESCRIPTION

Abode Natural Floor Cleaner is a non-citrus cleaner that really works!

A concentrated formula formulated using only naturally derived plant and mineral based ingredients (many of which are food grade), this floor cleaner cuts through the toughest grease and grime without leaving behind residue.

It's unique formulation completely does away with the cocktail of nasty chemicals found in many traditional brand products such as petrochemical solvents, bleaches, ammonia and semi synthetic plant surfactants such as coco betaine or etholyated compounds. Our unique formulation is designed to clean as effectively as supermarket brands whilst ensuring the health of your family is protected.

Our Floor Cleaner is designed to be free of damaging harsh fumes and VOCs. With lavender essential oil, our floor cleaner is designed to leave your house smelling like a home not a hospital!

STAINLESS STEEL CLEANER

Streak-free formula

- FOR ALL STAINLESS STEEL SURFACES
- UNIQUE STREAK-FREE FORMULA
- MICROFIBER CLOTH COMPATIBLE

PRODUCT DESCRIPTION

Abode have released a new stainless steel cleaner that is sure to impress! Most conventional chemical cleaners are strongly abrasive and can scratch and permanently damage the surface.

Our cleaner removes grease, grime, food splatters and finger prints from any stainless steel appliance from refrigerators, stoves, ovens and rangehoods – giving outstanding streak-free result!

Specifically formulated for use with a microfiber cloth to give you an unbeatable residue free clean. Using only naturally derived plant and mineral based ingredients, the unique formulation completely does away with the cocktail of nasty chemicals found in many traditional brand products such as petrochemical solvents, d-Limonene and LABS acids as well as semi synthetic plant surfactants such as coco betaine or etholyated compounds – so no harsh fumes or VOCs.

Microfibre Cleaning Cloths

- KITCHEN & GENERAL PURPOSE
- BATHROOM & HEAVY DUTY
- GLASS & POLISHING

Fibreteq ultra microfibre cleaning cloths are amongst the most technologically advanced microfibre products in the world. Using a patented process, each cloth has been uniquely designed to remove dirt, grime, scum and bacteria that commonly pervade your home.

These clothes are over 25% thicker than most microfibre cloths and will absorb up to 7 times their own weight, whilst enabling you to clean an entire room before you need to rinse them out!

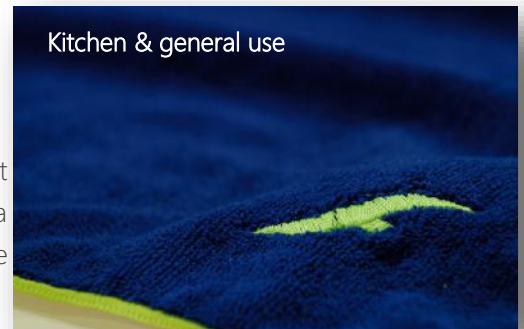

Fibreteq products are made from the highest grade polyamide available. Their thickness and size ensure the best possible cleaning experience.

For best results, use with recommended Abode products:

KITCHEN & GENERAL USE - Abode Surface Spray

BATHROOM & HEAVY DUTY - Abode Bathroom Cleaner

GLASS & POLISHING - Abode Window cleaner, Stainless Steel Cleaner

CARE INSTRUCTIONS: Wash separately before use. Rinse in warm water to release the dirt and grime. Allow to dry between uses. After every few uses, we recommend that you put it in a hot wash (no linen bag required).

BOOK

HEALTHY HOME HEALTHY FAMILY

Nicole Bijlsma

WHAT COULD BE MORE IMPORTANT THAN THE HEALTH OF YOUR FAMILY?

Healthy Home, Healthy Family shocks with revelations about sick homes, but shows how anyone can take charge of their family's health in simple ways.

In the past 20 years, childhood allergies and Attention Deficit Hyperactivity Disorder have increased by 400%, one in four children have asthma, breast and testicular cancer has more than doubled, the age of puberty is dramatically declining, sperm count has dropped by 50% and IVF is now where you go to have children!

Could all these conditions be linked to your home? YES!

Nicole uncovers the health hazards in our homes – from mould, dust, electromagnetic fields and plastics, to drinking water and chemicals in household products and – substantiated by credible sources – she links them with the rapid increase in allergies, Chronic Fatigue Syndrome and electrical and chemical sensitivity. There is a special section for pregnant women and those with breast cancer. She provides the reader with practical checklists to assess their own homes.

ABOUT THE AUTHOR

Nicole Bijlsma is a woman of passion, and her passion lies in environmental medicine. She first became interested in building biology when she began to notice the connection between many of her patients' ill health and their homes.

Nicole is a best selling author, accomplished naturopath, acupuncturist and building biologist and the founder of the Australian College of Environmental Studies which provides nationally accredited training in Building Biology.

HEALTHY HOMES

TIPS FOR CREATING A HEALTHY HOME

Bring in the fresh air! The easiest way to improve the indoor air is to let more of the outside air in. Keep windows and doors open as much as possible to allow good air flow around the house. The indoor air climate should feel as fresh and alive as the outdoor environment.

No shoes in the house. Removing your shoes will significantly reduce levels of dust, dirt, germs, pesticides, and many other unwanted things you've been walking around outside in. Place door mats at the entrances to wipe shoes and remove dirt and residue.

Invest in a quality vacuum. Conventional vacuums without a quality HEPA filter will recirculate up to 80% of materials back into the air! HEPA (high efficiency particulate air) filters will filter particles down to 0.3um which traps the smallest of dust, mites, mould spores and dirt, preventing it from becoming airborne.

Switch it off at night! Electrical appliances should not be in the bedroom. Turn off ALL bedroom electrical appliances at night – especially WIFI. Power boards, phones, bed lamps, baby monitors, need to be at least 1.5 meters away from your head, not under the bed, on the side table or under the pillow – and switched OFF at the wall. If your phone is your alarm, put it on flight mode and away from the bed so then you have to get up!

Reduce your chemical burden. Women put over 500+ chemical on their bodies every day, and it takes less than 25 seconds to be absorbed through the skin. Replace these products with organic and natural alternatives. Look beyond their 'claims' and ensure it has proper certification from legitimate organic bodies.

Clean Green. Many commercial cleaning products contain toxic chemicals and with dangerous label warnings. How safe can a product labelled 'POISON', 'CORROSIVE' or 'TOXIC' be? Disinfectants, oven cleaners, drain cleaners, mould cleaners, window and floor polishes often contain a potent mix including solvents, bleach, ammonia and chlorine. Replace chemical cleaners with natural, non-toxic alternatives, many ingredients are common household products! Recommended brands that actually work?...you can trust Abode!

Filter your water. Our drinking water is purified or disinfected before flowing out our taps. Chlorine is universally used to chemically disinfect water and is added to your water to destroy germs, bacteria and living organisms, and is known to cause skin irritation, dermatitis, eczema, asthma or breathing difficulties. Only 4% of the world's drinking water continues to be fluoridated, and 97% of western European countries banned it due to insufficient evidence to prove its safety. Invest in quality water and shower filters. Reverse osmosis systems will remove 99.9% of chemicals, including fluoride, bacteria, cysts and heavy metals from tap water.

Bring the outdoors inside! Indoor plants are amazing air filters and purifiers. They help maintain ideal humidity levels and add colour and life to any room! NASA actually tested a range of plants to determine their ability to remove certain pollutants from the air including common volatile organic compounds (VOCs) – benzene, formaldehyde and trichloroethylene. The results were impressive. Native Kentia Palm, Mother-In-Law tongue, Peace Lily, English Ivy and Bamboo Palms and are some of the best plants for absorbing these pollutants and suitable for indoors.

The power of sunshine. Sunny, hot days are perfect to air your mattresses, rugs and doonas out. Did you know that an average queen size bed contains over 2 BILLION dust mites, plus lots of other nasty things... and that favourite pillow you've slept on every night for 2 years – 10% of its weight is now dust mite poo and carcasses! Yuk. A whole day exposure to full UV sunlight will sterilize and kill dust mites. Airing doonas, rugs and pillows weekly will also kill bacteria and dry out any moisture.

Simple changes to daily habits and purchases can make a big impact on your long term health. Consult a qualified Building Biologist to come assess your home or workplace to ensure the long term health and safety of you and your family.
