

Silicone Free Shampoo

This revolutionary shampoo is silicone free, sulphate free, palm oil free, gluten free, paraban free & 100% vegan. envirocare shampoo has no animal products in it.

Silicone builds up on the hair shaft to make hair limp & lank and blocks out the beneficial attributes of conditioners, treatments and absorption of colour or dyes.

Added hemp oil helps prevent water loss and injects moisture into the scalp & hair. The lipids present in hemp oil increases hairs elasticity, volume & shine & also stimulates hair growth through omega's 3, 6 & 9. Hemp oil contains gamma-linoleic acid, which improves the condition of hair & contributes to keratin formation for stronger & healthier hair.

Use for 2 weeks with Silicone Free Hair Conditioner to eliminate the build up of silicone. Adding some apple cider vinegar to the rinse water will aid in removing the silicone.

Removing silicone, sulphates & palm oil from your shampoo & conditioner is the best outcome for your hair, making it healthier, giving more volume & adding more moisture.
