Why do we use Bamboo?

- Made of Bamboo, NOT WOOD OR PLASTIC
- Bamboo is stronger, lighter & more durable than wood
- Bamboo is more resistant to water than wood
- Bamboo is naturally anti-bacterial
- Beautiful & unique design
- Bamboo is naturally biodegradable Plastic is not

A Greener Brush?

- Bamboo is a 100% natural renewable resource
- Bamboo grows back within a few months and to full size in 3 years - vs. Regular trees can take 25 years
- Bamboo is farmed - vs. Wood comes from cutting forests, damaging to the environment, habitat, and contributing to global warming
- Bamboo grows naturally without using any pesticides or fertilizers
- Bamboo is 100% biodegradable
- Smaller carbon footprint than wood-cutting
- Bamboo is the eco-friendly alternative to Wood and Plastic.
