WHEN TO RECOMMEND

Ideal for dogs that are:

- Pre-disposed to Osteoarthritis genetically (eg. large breed dogs), overweight and very active dogs.
- Displaying the clinical symptoms of osteoarthritis including lameness, stiffness, pain and a reluctance to run and play.
- Recovering from injury and surgery.

APPLICATION

Feed daily.

BENEFITS

Every day joint care - Each PAW Osteocare[®] chew contains:

- **500mg Glucosamine Sulfate** to provide cartilage nutrition for optimal joint cartilage health and joint function.
- **250mg Chondroitin Sulfate** is a major component of joint cartilage and is required for cartilage and joint health.
- **Balanced combination of other nutrients for joint health** such as MSM and a balanced blend of vitamins and minerals that work together to maintain the health of your dog's joints.
- **Highly palatable chew:** Tasty kangaroo-based chew that is easy to give to dogs on a daily basis.

SAFETY DIRECTIONS

Avoid inhalation of dust. For Animal Treatment Only.

COMPOSITION

Kangaroo meat & meal, rye flour, soy flour, glucosamine sulfate, chondroitin sulfate, sucrose, calcium ascorbate (Vitamin C), dimethylsulfone (MSM), natural preservatives, manganese gluconate, natural flavour.
