

**WHEATGRASS AT WORK.
REMARKABLE BEFORE & AFTER WHEATGRASS PHOTOS
FROM DR. CHRIS' CASEBOOK**

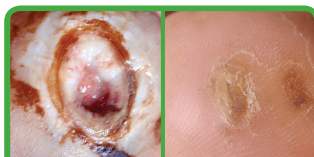

Large bruise disappears overnight

Molluscum gone in 6 weeks

Severe eczema responds in 2 months

Diabetic foot ulcer heals in 4 weeks

SOME AMAZING DR WHEATGRASS TESTIMONIALS

Molluscum: How wonderful! I can't wait to show our GP what amazing results we have had with your spray.

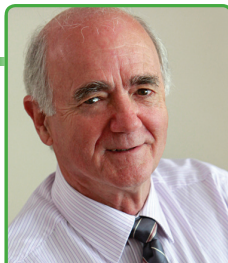

Injury: I tried your wheatgrass SuperBalm on a very swollen ankle after a fall (approx 3 times normal size), it was completely gone the next day! No ice used.

Cracked Nipples: Amazing! I only managed breastfeeding for five weeks with my first child because of cracked nipples. My second baby is now nearly 8 weeks old and I am still going thanks to SuperBalm. I think you should market it as a nipple cream!

Irritable Bowel Syndrome: From the first week of taking Supershots I had not had an attack. My pills haven't been touched and are now in the bin. Nearly 2 years now and I only take the shots.

Anal Fissure: My God, this cream is truly a miracle cream! I started to feel it work on the 2nd day. I want the whole world to know about this cream!

Diabetic Foot Ulcer: The wheatgrass spray is for my mom. Her wound has started healing and it is actually getting smaller now. So I really believe that this is a very effective treatment.

Dr. Chris Reynolds M.B., B.S.
(Dr. Wheatgrass)

**DOCTOR RE-DISCOVERS
THE REMARKABLE HEALING
PROPERTIES OF WHEATGRASS**

Since 1995, Australian doctor, Dr. Chris Reynolds, has combined the experience of 50K+ clinical observations and substantial

scientific evidence to show that wheatgrass:

- Is a potent wound or injury healing application.
- When taken daily assists continued wellbeing and wellness, most likely by normalising and stimulating the immune system.

Armed with this evidence to back wheatgrass as a low-cost, self-help remedy for a variety of conditions encouraged Dr. Reynolds to share these health benefits with the rest of the world. His Company, Wheatgrass Pty. Ltd., established in 2002 now exports to more than a dozen countries from its central office in Queensland, Australia. This has mainly been achieved not by advertising, but by word of mouth – an amazing endorsement of how effective wheatgrass is.

WHAT IS WHEATGRASS?

The core ingredient in all Dr Wheatgrass products is a potent extract derived from fresh, young, vital, wheatgrass sprouts. The extraction process, (a trade secret) maximises bioactive yield and therefore, enhanced efficacy when used topically or taken internally.

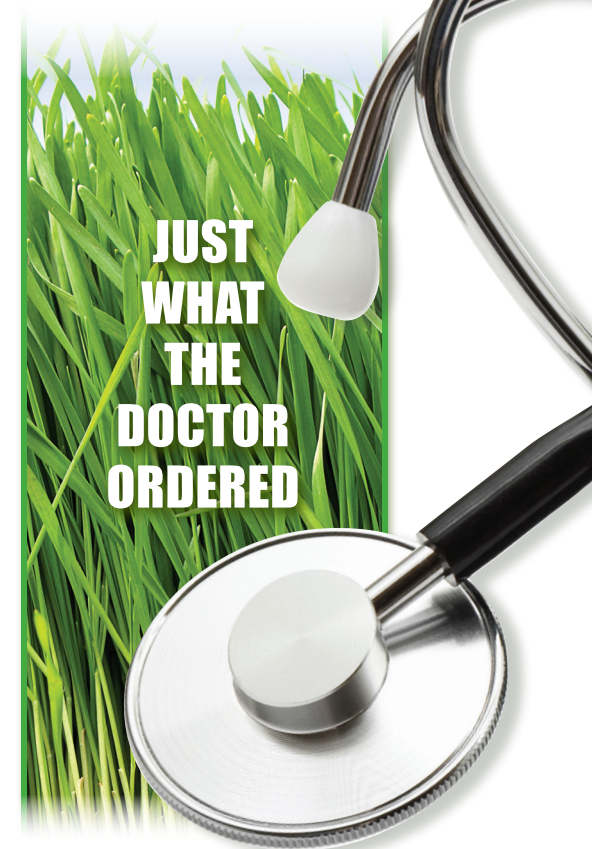

Laboratory studies confirm that this extract contains well over 25% more antioxidants and bioflavonoids than freshly juiced wheatgrass. A substantial difference. This high level of bioactivity can significantly improve one's quality of life in many ways.

HOW DOES WHEATGRASS WORK?

Even though there is a large body of scientific and clinical information available about wheatgrass and its numerous positive effects, the exact answer to this question remains unknown. However, to summarise briefly what we do know, wheatgrass is a potent anti-inflammatory, immune-modulator/stimulant (most likely the innate immune system), pain-reliever, fertility factor and growth factor activator. The latter effect hastens wound healing, prevents infection and accelerates soft tissue injury recovery.

In a word, wheatgrass helps the body repair itself.
