

Soft Silicone Bristles

Gentle on tiny teeth and sensitive gums

100% Medical/Food Grade Silicone

BPA & PVC Free

Double Sided - cleans top & bottom, front & back at the same time!

**Directions:**

Wash thoroughly before and after use. Apply a small amount of Jack N' Jill Natural Toothpaste to brush. Gently slide brush over teeth with a forward/backward motion.

We know these look really weird, but they really work. Because they 'hug' the teeth, kids find them really easy to use, even on their own.

**Use only under adult supervision.**

**Do Not Chew!**

**Safe For Infants!**
