

The essential immune formula every dispensary needs:

BioResearch Formula 5

Echinacea angustifolia (Echinacea) may assist with the acute stages of autoimmune infections, infections and inflammation involving the lymphatic system and aching in the limbs.

Juniper oxycedrus (Cade oil) is known to have powerful antiseptic, antifungal and antimicrobial properties.

Hydrastis canadensis (Golden seal) may improve the health of mucous membranes, the lymphatic system, the digestive system and the circulatory system.

Eupatorium perforatum (Boneset) may help to relieve pain in the limbs related to fever and cracked lips related to colds and flus.

Allium sativum (Garlic) is a powerful antimicrobial and may assist with respiratory ailments.

Juniperus communis (Juniper) may be beneficial for respiratory ailments, kidney inflammation and cystitis.

Pollen has powerful antimicrobial benefits and may help to relieve allergy symptoms.

Ferrum phosphate is a cell salt that can help to reduce fever and inflammation, and can help to combat infections.

Kalium muriaticum & Natrum muriaticum are cell salts that may be beneficial for colds and flus with clear mucous, sinusitis and ear infections.

Calcium carbonicum may be beneficial for thick yellow expectoration and lymphatic inflammation around the throat.

Each ingredient is potentised to a 6C, 12C and 15C dilution
