

The UNIQUE beta glucan delivery system for the skin

# Ganodex™

Topical Cream

Ganodex™ is an innovative emollient cream, with the scientifically researched triple-helix beta glucan combined with honey and coconut oil, for skin irritation, itching, and scaling.

- Suitable for scaling, itching and irritated skin
- Quickly absorbed. No oily residue after application
- Daily application for smoother and softer skin
- Supports the itch-scratch cycle on dry skin
- Can be used 2-3 times daily for 'problem' skin

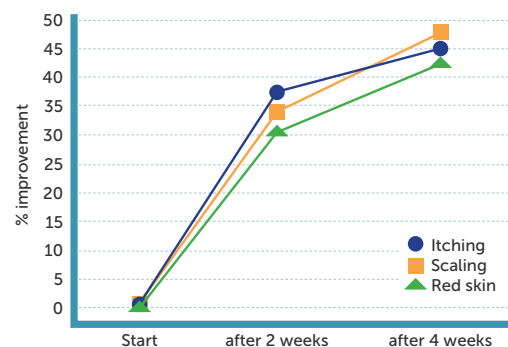

Triple-helix beta glucan is derived from the reishii mushroom (*Ganoderma lucidum*), a species which has been used in Chinese medicine for more than 2000 years. With daily application, beta glucan may modulate the skin's complex milieu.

*In a clinical survey with 29 participants, Ganodex™, applied at least twice daily for four weeks, reduced itching (45%), scaling (47%) and redness (44%).*

Ganodex Pilot Survey, November 2013, Glycanova.

Using patented technology, Ganodex™ has been developed as the only skin cream on the global market containing a pure, triple-helix beta glucan. The unique extraction process retains the natural triple-helix structure with a high molecular weight, important for biological activity and absorption.

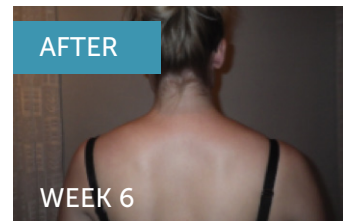

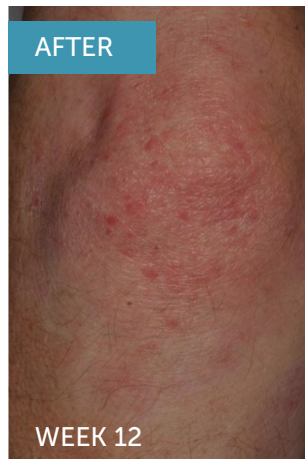

Additionally, all active ingredients used in Ganodex™ are obtained from natural sources only. These are added to aid absorption, give a moisturising effect and to make the cream easy to apply. It does not contain cortisone, parabens or tar.

*Ganodex™ is the only skin cream developed with triple-helix beta glucan from medicinal fungi and is free of chemical processing. Soluble and clinically tested.*

Used for:

**Scaling skin • Dry skin • Itchy skin • Irritations**

## With the added benefits of coconut oil & honey

### Coconut oil

- Skin soothing and hydrating
- Rich in medium-chain fatty acids
- Replenishes and restores skin glow

### Honey

- Moisturising and soothing
- Humectant properties
- Great for wound healing
- Rich in antioxidants

#### Directions:

Apply to the affected areas at least twice daily and always after showering. Avoid contact with eyes.

#### Storage and Usability:

- Do not apply the cream to open wounds
- The cream must not get into contact with eyes or other bodily orifices, e.g. mouth, nose or ears
- Keep away from children
- Store in a dry place below 30 °C
- Protect from direct sunlight

A non-steroidal, paraben and tar free cream. Not tested on animals.

#### Ingredients:

Aqua, *Cocos nucifera* (coconut) oil, paraffin, glycerine, stearic acid, honey, cetyl alcohol, beta glucan, potassium sorbate, sodium benzoate. Contains ingredients for their moisturising and emollient effects, and to make the cream easy to apply.
