

Nutraviva Original Beef Bone Broth

Bone broth has long been associated with maintaining a healthy immune and digestive system and reducing inflammation within the body.

Nutraviva Original Bone Broth is made from multiple collagen sources incorporating the three most common forms of collagen found in the human body: types I, II and III. Our high quality bone broths are nutrient-rich sources of protein, minerals and vitamins, making them the ideal choice for naturally supporting the immune system and digestive health.

Original Beef Bone Broth 100g

Original Beef Bone Broth 250g

Key points of difference:

- Nutraviva Bone Broth powder is made from grass fed & pasture raised New Zealand cattle bones ensuring the highest quality and ethical considerations for the product.
- Nutraviva broth powders are a multi-collagen formulation made from all natural ingredients with no artificial preservatives or flavours.
- A low temperature cooking process is used to draw out the collagen, marrow and other healing elements including the amino acids, vitamins and minerals from the bones.
- Nutraviva Bone Broths are low in calories, satiating, and high in protein and minerals. Just one cup of bone broth has around 10 grams of protein including nearly 20 different essential and non-essential amino acids.
- Our Bone Broth range have a delicious natural flavour profile and are not over powered by the high salt content often found in pastes and concentrates.
- Long life and shelf stable powder that is easy to prepare and convenient to use as a stand alone nourishing broth in hot water or to enhance cooking.
- Gluten & dairy free. Keto & paleo friendly.

Ingredients:

New Zealand grass fed beef bone broth powders (beef bones, filtered water). Grass fed and finished beef collagen, yeast extract, salt, natural beef flavour.
