

Nutraviva Collagen Hydrolysate

Nutraviva Collagen Hydrolysate contains smaller pre-digested peptides compared to those found in intact proteins, allowing them to be absorbed by the body more rapidly maximising nutrient delivery to cells. Collagen Hydrolysate contains a unique profile of amino acids, including eight of the nine essential amino acids. Glycine, hydroxyproline, proline and arginine account for over half of the amino acid content of collagen hydrolysate. It is this uniquely high concentration that assists with the health benefits associated with collagen supplementation.

Ingredients:

Pure bovine collagen hydrolysate peptides.

Collagen Hydrolysate 100g

Collagen Hydrolysate 450g

Key points of difference:

- Grass fed & finished ensuring the highest quality and ethical considerations for the product. There are no nasties added to our products including hormones, pesticides or GMOs.
- 100% pure & natural collagen peptides. Nutraviva collagen is not blended with inferior grade collagen powder, fillers or binders unlike some competitors who do not provide transparency in nutritional information regarding sourcing and blending. This effectively hides from customers whether a product is grain fed or sourced from countries that do not uphold strict standards for sourcing, traceability and food safety.
- Gluten & dairy free. Keto & paleo friendly. Kosher certified.
- Our Halal Certified Collagen Hydrolysate is the only Australian owned halal certified collagen powder currently available in the Australian market.

Collagen Hydrolysate Halal Certified 450g

Collagen Hydrolysate Halal Certified 800g
